

NOTES:

1. SUBSTRATE TOLERANCE NOT TO EXCEED 1/4" PER 10' HORIZONTALLY AND VERTICALLY.
2. APPLY LPS #1 GREASELESS LUBRICANT ON TOP HORIZONTAL SURFACE OF ANCHOR IN CONTACT WITH THE ALC LIMESTONE PANELS. THIS GREATLY AIDES IN THE MOVEMENT OF STONE ALONG THE CONTINUOUS ANCHOR STRIPS, AND PROTECTS ANCHORS' KYNAR COATING.
3. ALLOW 1" MIN. GAP BETWEEN CONTINUOUS ANCHORS TO PROVIDE SEEPAGE.
